And i see(5x)

The hold out boy and the weather girl
you know the wind moves in a patient way
like a two decade day
the man in the mouth of a train
laughing and chewing erasers
like a black dog in the snow

ride in relief and sleep again
and you can't believe your eyes
and you can't find your pen
and the man in the hole is you new friend's friend

And i see(4x)

symmetrical foot in your mouth and your high speed
legs
you need your some mark of distinction

it's an elevator put on

count your dollar only one
count it again one one one
you can't count it when your dead no
you keep a pure note

ride in relief and speak again
and you get in the hole with your new friend's friend
and he can't believe his eyes and he can't find his pen

the meteorological man with a whirl wind girl
and a mode in the sun
and a squid in a bag
and a racoon hat
and a talking plant
and a careful goat in a sewer system shaft

And i see(13x)
