You're always running around with everyone else but
me

You're such a catastrophe

Hold on, you've been running around so long

And soon I'll be gone

You've got to build it up and then break down

Give it a taste and drop your jaw to the ground

Then you'll know what to do and we'll pick it up

Pick it up and give it right back to you

Save your breath and get down with me

I never thought it would be this easy

To spread you like a disease

In this heat you'll be sweating out your dignity

You'll always be such a catastrophe

I've been making a list

Of all your so called "big plans"

And I'm really having trouble

Cause it's longer than my attention span

Wait, what were we talking about again

You've got to build it up and then break down

Give it a taste and drop your jaw to the ground

Then you'll know what to do and we'll pick it up

Pick it up and give it right back to you

Save your breath and get down with me

I never thought it would be this easy

To spread you like a disease

In this heat you'll be sweating out your dignity

You'll always be such a catastrophe

And how about yourself?

Do you have what it takes

To raise the steaks and that you have it in you

To just pick up and go

Give me a reason just to see things through

To the end because I'm on to you

I'm going to need a shovel to dig myself out of this one

Save your breath and get down with me

I never thought it would be this easy

To spread you like a disease
In this heat you'll be sweating out your dignity
You'll always be such a catastrophe

Save your breath and get down with me
I never thought it would be this easy
To spread you like a disease
In this heat you'll be sweating out your dignity
You'll always be such a catastrophe
