Your will it drifts forever in the open air  
My head, it looks forever but there's no one there  
Don't say, you'll wait forever then you disappear  
I'll stay, I'll stay forever if you want me here

And I'm always thinking about it

How can I accept your disappointment man  
It's not exact, it's no science man  
I want it less than you ever have  
I can't accept your disappointment man

Damn straight  
'Cause there's always someone who'll compare

I'd wait, I'd wait forever if you want me here  
But I'm always wrong about it

How can I accept your disappointment man  
It's not exact, it's no science man  
I wanted less than you ever have  
I can't accept your disappointment man

How can I accept your disappointment man  
It's not exact, it's no science man  
I wanted less than you ever have  
I can't accept your disappointment man

It's not exact, it's no science man  
I wanted less than you ever have  
I can't accept your disappointment man
