We were so young since we met,
we were friends.
after a while all this feeling set in
I never know is to one day with you
my heart is falling fast,
what should i do?
Wanted to tell you but didn't know how
I'm trying to hide but i'm feeling it now.
next time i see you i looking in your eyes
and tell you exactly what's going inside.

Senorita i feel for you, now do you feel for me?
but when i'm dreaming, and in your phone book i'm just
a name
i gotta know now, i cant go on like this, just being
friends
with you senorita

Senorita i held it back too long inside in me
but now im trying, im searching for the words
i wanna say, your all i want, it's killing me living like this
just being friends with you senorita

verse 2

i remember, the first time, when u look at me
My heart went crazy, and my knees fault weak
i tried to say how, but all i could do,
is watch you walk by me, cause i looked at fool
as time when all we became real good friends
spoke on the phone everyday girl and then
i fall asleep with your voice in my head
i never knew i would fall for my best friend.

Senorita i feel for you, now do you feel for me
but when i'm dreaming, and in your phone book i'm just
a name
i gotta know now, i can't go on like this, just being
friends
with you senorita.

Senorita i held it back too long inside in me

but now im trying, im searching for the words
i wanna say, you're all i want, it's killing me living like
this
just being friends with you senorita.

bridge:
Somehow i gotta tell you how i feel before its too late
and you walked out for me
you're all i want and its killing me living like this
just being friends with you senorita.

Senorita i feel for you, now do you feel for me
but when i'm dreaming, and in your phone book i'm just
a name
i gotta know now, i can't go on like this, just being
friends
with you senorita.

Senorita i held it back too long inside in me
but now im trying, i'm searching for the words
i wanna say, your all i want, it's killing me living like this
just being friends with you senorita.
