Well hello our circle's back to whole again
Here we go tonight we pile around the bend
City lights delight providers for the head
We afloat tonight the heaven is our bed

Lift me up my friend
Fill the cup and then...

My friends we are one again tonight
My friends we are one of the same kind
My friends are we gathered for the fight
We are

In time we'll be together
I'll be home forever
To say hello again
Well hello my friend

My friends we are one again tonight
My friends we are one of the same kind
My friends are we gathered for the fight
We are

Open your mind and be adventurous
You get but one try
Open your eyes and be the things you want
And rely on with no spite

My friends we are one again tonight
My friends we are one of the same kind
My friends are we gathered for the fight
We are
