(Maurizio Costanzo/Ghigo De Chiara/Ennio Morricone)
adaptation anglaise Julian More

Life is never only one man, one single face shining
bright
Life is never only one love, there with you in the night
You don't need much to light the flame and so little to
be burned
Here am I with you all the same, I'm forgetting all I've
learned

I will change my whole life
Everything I ought to remember will soon be gone
I will change my whole life
If that's what you want, I'll be glad to let you lead me on
I will change all my friends
If that's what you'd like, I'll do anything you want me to
If you really love me
I know I could give it all up and change my whole life
for you

I will change my ideas
And I admit until I'd met you that I was all wrong
I will change direction
Without a doubt about the road that I'm going along
If you're there to lead me
If there's a chance, a million to one chance, now that
you'll stay
If you really love me
As crazy as it may seem, I will change my whole life
today.
