I wanna live my life in stereo cuz nothing real is going  
right  
when i want someone to turn me on i can signal with my  
red light  
when i want to i can amplify the parts of me you like the  
best  
just the same i can equalize the two loud parts of the  
rest

i wanna live my life in telephone cuz all that's real is  
going south  
when i want to i can hang it up  
before what's in the heart gets to the mouth  
there will be a directory and all i have to do is look you  
up

then i'll know just where you're at before i go and mess  
it up

i wanna live my life in video so i can rewind the parts i  
like the best.  
i look forward to the episodes that haven't happened  
yet.  
i can leave all the sad parts out i can change the way  
the story goes.  
make myself the main character, put you in the  
supporting role.
