Every time I go around here
I see tumbles

Gone is the Regal automobile
And ever since I'm down, I'm down
We used to ride in it
In this frozen town

Any time we had, in the time we had
We found, we found
In some frozen place
Parked half off the ground

Every time I go around here
I see tumbles through my head
And the glass cleared
And the motor rumbled

I don't know if it's good
That they did make the wheel
But ever since I know, I know
I've been rolling on
Rolling on to you

Any time we have, in the time we have
We'll go, we go
To that frozen place
Frozen place that we knew

Every time I go around here
I see tumbles through my head
And the glass cleared
And the motor rumbled
