No love
no word
no future
a child from the street
a child from the street
And one day she decided a fight
and one day she decided to win
she decided to win

She's called Angel Face
She looks at you
with great expressive eyes
Angel Face but she is cold as ice

And one day she decided a fight
she never get love
And one day she decided to win-
she decided o win

She's called Angel Face
she needs to be
the number one in in life

Angel Face
life's a place to fight

And one day she decided to fight
and one day she decided to win

She was a child from the street
and she seemed to be lost
life's a place to fight
and she learned to survive

And one day she decided to fight
and one day she decided to win
but deep inside she cries for love
love

And one day...
