Here comes another round of deploy and deter more
strong words for bullshit
That doesn't work levers pulled for pulling levers while
grown adults stand &
Applaud stronger measures home security is taken on
faith as larger apparatus
Slowly slides in to place!!!! No bells toll when lights dim
in prison halls
No tears slip when solemn state duty calls just you wait
until you get in the
Way murder the sons of bitches make them pay for
their victims pain this may
Not always work but by god they'll never do that again
& the flesh still works
Up until the switch is thrown but the state lives on long
after it's cells are
Gone just you wait this is how it starts
