Goodnight, my love, sleep tight, my love
It's almost dawn, remember me in your dreams
Just one more kiss and after this
I must be gone, remember me in your dreams

The hours seemed like minutes while I held you near
The minutes will be hours till we meet again so dear
Before we part please take my heart
And don't forget to remember me in your dreams

Remember me in your dreams
Remember me in your dreams

The hours seem like minutes while I held you near
The minutes will be hours till we meet again so dear
Before we part please take my heart
And don't forget to remember me in your dreams
