

Frank Sinatra "Searching"

Visit "[Searching](#)" on MotoLyrics.com

All our days, we searched for just one love
Wait for that one kiss
In a word, we spend our life just waiting
To give our hearts away

Searching all our lives for that special day
And then one day you come upon a smile
Unlike, unlike any smile

In a word, the searching is done
You come upon the only one
She stands there looking at you
Simply says, "How do you do?"
And all the searching is through

In a word, the searching is done
You come upon the only one
She stands there looking at you
Simply says, "How do you do?"
And all the searching is through
