

Frank Sinatra

"Starlight Sonata"

Visit "[Starlight Sonata](#)" on MotoLyrics.com

You're my song from a world way up high
You are my starlight sonata out of the midnight sky
There's no melody sung by a lark
Sweet as my starlight sonata after the sky grows dark

Your arms are such a thrilling place
When we embrace like this
The promise of eternal love
Is trembling in your kiss

Twilight sings of a heaven-to-be
Bringing my starlight sonata straight from your heart to
me

Your arms are such a thrilling place
Where we embrace like this
The promise of eternal love
Is trembling in your kiss

Twilight sings of a heaven-to-be
Bringing my starlight sonata straight from your heart to
me
