damn..

i can't believe we just went through this
it's always screwing up, it's always the same thing
i can't get use to this shit

you are the only reason why i did this shit
tell me that you've already forget (oh)
original pain was to have two kids and a dog
and build a castle from the ground up (oh)
but all of our dreams were shattered
the moment we didn't matter anymore (anymore)
my words don't have any meaning
you're always thinking i'm cheating
i can't convince you girl at all (oh no)
i just don't understand the way that you be loving
i gave you every single thing when you had nothing
i'm tired of fussing and fighting
i don't know why we keep trying
baby it's over you know i'm going home

(it's gonna be a long drive home)
it's gonna be a long drive home
(it's gonna be a long drive home)
it's gonna be a long drive thinking about you all night
(yeah)
it's gonna be a long drive home
a long drive home, a long drive home, a long drive
home

i'm turning up my radio loud enough
just so i don't hear your voice in my head (whoa)
and i really don't understand why you making me feel
this way,
i don't understand it
i gave you my soul and my heart
baby i took it this far now you wanna check out on us
there's only so much i can take
so many hits before i fall
but for you i would take them all
baby i just don't understand the way that you be loving
i gave you every single thing when you had nothing

i'm tired of fussing and fighting
i don't know why we keep trying
baby it's over you know i'm going home

(it's gonna be a long drive home)
it's gonna be a long drive home
(it's gonna be a long drive home)
it's gonna be a long drive thinking about you all night
(yeah)
it's gonna be a long drive home
a long drive home, a long drive home, a long drive
home

all the hurt, all the pain
love shouldn't feel this way
when i'm here you ain't here
that's why i'm driving away
i guess i'm ready to be a better love all over again

(it's gonna be a long drive home)
it's gonna be a long drive home
(it's gonna be a long drive home)
it's gonna be a long drive thinking about you all night
(yeah)
it's gonna be a long drive home
a long drive home, a long drive home, drive home
it's gonna be a long drive home
a long drive, a long drive home

gonna roll down my window and feel the air
gonna roll down my window and feel the air on my face
turning up my radio so (?)
baby where did we go wrong? tell me
