the only way to love  
to love to love to love  
the only way to love  
the only way to love  
to love to love to love  
the only way to love

you've got to love her  
truly love her  
prove you love her with every kiss  
and when you kiss her  
really kiss her  
its like heaven to kiss like this  
give her a hug when things get blue  
and let her know your love is true  
so when you love her truly love her

thats the only way to love  
the only way to love  
to love to love to love  
the only way to love  
the only way to love  
to love to love to love  
the only way to love

give her a hug when things get blue  
to let her know your love is true  
so when you love her really love her

thats the only way to love  
the only way to love  
to love to love to love  
the only way to love  
the only way to love  
to love to love to love  
the only way to love
