"Strange Companion"

Visit "[Strange Companion](#)" on MotoLyrics.com

I slept last night with the wolves of longing
Awoke to find a new morning
I know it's mine
Though you left no sign
My strange companion
I don't know where you're coming from
Strange companion
Have you been there all along
Last night's child was weak and angry
Last night's child just woke up hungry
Did you come along
To right this wrong
Strange companion
Do you know what I'm hiding from
Strange companion
Have you known me all along
I am not the only one that wants you
I am not the only one that wants to
Break the surface of this deepest ocean
Break the silence set the world in motion
You showed me how
It's alright now
Strange companion
I don't know where you're coming from
Strange companion
Have you been there all along
