Verse I

I was a seagull in an endless flight
Circling the earth
Never landing
I flew into the eye of the secret storm
Then a bolt of lightning stuck my heart and I fell to the
bottom of a wishing well I fell

Chorus

Deep into your eyes
They don't seem to change colors calling out my name
I've got silence running through my veins
Patients the moment never came

Verse II

Moolinght shadows the desert sleeps
Will I find my way home tell my brother

Why why

Fate's an empty sky
Loves an ocean
Deep dark and blue

Chorus

Treasure I love your eyes
They don't seem to change
No more calling out my name
I've got silence running through my veins
Patients the moments never came

Bridge

While I lie
While I lie
The nights cold and dark
The nights cold and dark
Please please please
