Somewhere inside this fractured heart  
Lies the story of how you came apart  
Someone hurt you long ago  
Feelings overwhelming, burn me slow

There is no way down from here, there is no way  
There is no way to escape what you fear  
There is no way down from here, there is no way  
There is no way to escape what you fear  
Past lives tell us where to go  
And the reason you'll never let it show  
Losing what we had before  
Offered you my hand as you hit the floor

There is no way down from here, there is no way  
There is no way to destroy what you fear
