Get out and leave me alone  
To be myself in my damn home  
Don't want to talk don't want to hear  
And face to face my fucking fears

When everything it's gone  
I fell homesickness at home

Go away enjoy the bright of sun  
Go out with your friends have some fun  
There is no reason or place to me  
I'd better living so lonely

When everything it's gone  
I fell homesickness at home

I look my ventilator swinging  
I am lay down in bed singing  
Just call me when the world change  
Or when I get another chance

When everything it's gone  
I fell homesickness at home

When everything it's gone  
I fell homesickness at home
