Visit "[I Gotta Try](#)" on MotoLyrics.com

When the life illustrate a picture that looks not so good
You can live anyway even imitating a kinda goof
Everything 's faraway what u want or what u need
Don't worry it's okay can't touch a spine without to
bleed

Then my family says why you keep those things going
on
All my friends says buddy why don't you just give it up
But I said I gotta try

Frustate and afraid that you lost your damn job
Bursting yourself lungs smelling outside of you core
Look around you just can see a cold black dead end
Forsake your sad past set up a band with your friends

Then my family says why you keep those things going
on
All my friends says buddy why don't you just give it up
But I said I gotta try

Then my family says why you keep those things going
on
All my friends says buddy why don't you just give it up
But I said I gotta try
