Kisses that kill me are my friends  
I'm wasted on nothing now, but you again  
Shifting the colors from room to room  
I'm burning your images with my attitude

Naked desire blows me away haven't you noticed

I won't ever go let you suffer no pain  
Like bottleflies  
I won't be the same in this vaseline cage  
Like bottleflies

Sweet smell of roses around me  
Trapped in moments of fantasy  
Breaking my mind from myself, so hard to find

Chorus repeat
