"Before I Leave"

Visit "[Before I Leave](#)" on MotoLyrics.com

When we met we both had nothing
Like we have found thing in fortune
Looking back upon it it was crazy
I was going through depression
Mind was filled with so much questions
But somehow we made each other happy

When I wake up by your side
Guess my life see other side
Need to buy a ring and ask her
If she likes to be my bride
She said yes, I start to cry
Was it this 'Do you hear my lie?'"
Should I make this I
Gotta make her go in my way

Take my hand
I wonder if you'll join me
For this last dance
Before I leave
I have been wondering if you'll join me
For this last dance
Before I leave

Bags all packed and I'm moving out
Suddenly I see what life's about
Truly got me more agree with you now
Make love to you and work it out

Take my hand
I wonder if you'll join me
For this last dance
Before I leave

Do we have our ups and downs
I know we can work it out
I don't bet you gave away
Something I can't live without
Even when the sky is grey
Sometin' about the things you say
Seem to be the only way

That I can brighten up my day

You my sunshine when it's dark
Don't be mad when we're apart
You support me
Everything I do it for you with all my heart
Now I know you're feeling low
But it's best to take it slow
You should grab my hand
We'll hold each other
Till that feeling go

Take my hand
I wonder if you'll join me
For this last dance
Before I leave
I have been wondering if you'll join me
For this last dance
Before I leave

Bags all packed and I'm moving out
Suddenly I see what life's about
Truly got me more agree with you now
Make love to you and work it out

Take my hand
I wonder if you'll join me
For this last dance
Before I leave

Without you I don't know where I'd be
I cannot imagine nor see
A better future here for me

Without you I don't know where I'd be
I cannot imagine nor see
A better future here for me
