Did I wake you up again?
Talking in my sleep
Unfamiliar afternoon

We were out for a little while
Voices from the street
Sunlight in a rented room

I don't know how
You get me lost
Forgotten where I'm running from

I have found
You get me lost
And I don't care where we're going

I'll follow you to your cloud
Or meet you underground
Take me with you either way

What if we'd never met
You lead me to forget
What I was about to say

I'm turned around
You get me lost
Directions wrong, way unknown

I have found
You get me lost
And I don't care where we're going
