Go!
Well I like to rock and I love to roll,
When the music's running through my soul
I've got no, no place to go but my own private radio
I met a lot of people that made me feel alright
And their music's got me through the night
Go!

Well I had a drink and I had a smoke,
I listened to every word you spoke.
Another story, another memory,
Another day the way things should be

If I had it my way everyone would know
How we're living in our, our own private radio (private
radio)
Private radio, private radio (private radio), private
radio, private radio
(Private radio), private radio, private radio
(Private radio), private radio, private radio

If I had it my way everyone would know
How we're living in our, our own private radio...
(Private radio), private radio, private radio,
(Private radio), private radio, private radio
(Private radio), private radio, private radio
(Private radio), private radio, private radio
