It's automatic
It's automatic
It's automatic
It's automatic

Girl I can see right through your false defenses
You act as if you can ignore the sound
My force detectors tell me your pretending
All of your systems are about to go down

No need to panic, I know you feel it
If you can stand it, just dance
I'm your mechanic, I know you feel it
This automatic romance

It's automatic
It's automatic
It's automatic
It's automatic

I know the secrets to your circuitry girl
To your diskette I have to access code
Don't try to fight this electricity girl
From all this power you might overload

No need to panic, I know you feel it
If you can stand it, just dance
I'm your mechanic, I know you feel it
This automatic romance

It's automatic
It's automatic
It's automatic
It's automatic

Girl I can see right through your false defenses
Before you know it, I will be in control

My force detectors tell me your pretending
Your force repeller can no longer hold

No need to panic, I know you feel it

If you can stand it, just dance
I'm your mechanic, I know you feel it
This automatic romance

It's automatic
It's automatic
It's automatic
It's automatic

It's automatic
It's automatic
It's automatic
It's automatic

It's automatic baby, it's automatic
I realize baby all the things you fantasize baby
It's in your eyes baby so let your body rock
Shake that thing

I'll make you wet baby
I'll make you sweat baby
I'm your best bet baby
So let your body rock

I know you feel it, just dance
I know you feel it, romance

It's automatic
It's automatic
It's automatic
It's automatic

It's automatic
It's automatic
It's automatic
It's automatic

I know you feel it, romance
I know you feel it, just dance
No need to panic, I know you feel it
This automatic romance
It's automatic, I know you feel it
