Last night was bad,
My doubts were all I had,
Realizing I was alone, and
Trying to think of someone to phone, but
No-one came to mind,
There was nothing for me to say,
That just anyone would understand,
I was scared and afraid,
I was So alone,

(We've had it!)
We're neurotic,
(We've had it!)

Surround myself with people,
But I'm always alone,
Human props,
Small talk,
Keeps silence from imposing,
My own mind my,
Worst enemy it will destroy me slowly,
More coffee, more coffee, more coffee!
I'm going numb,

(We've had it!)
We're neurotic,
(We've had it!)

It's hard for me to explain,
It's hard to explain, it's hard to understand,
All the fear and phobia that lays inside,
And traps this man,
When I'm surrounded,
I wanna scream and kick down the walls,
Destroy what holds me,
I wanna smash it,

(We've had it!)
We're neurotic,
(We've had it!)
