We came in broad daylight  
We saw cities burn at night  
We conquered through the ice and hail  
To untamed lands we sail  
No sea shall vanquish our fleet  
Our army knows no defeat  
Our dragon masts pave our trail  
To untamed lands we sail  
The sunwheel is our orifice  
In the name of the gods we'll sacrifice  
History will recant our tales  
To untamed lands we sail  
We'll drink your blood from the chalice of gold  
Your weakness is what makes us bold  
Take another drink from the grail  
To untamed lands we sail  
Chorus:  
Forward we plunder, cities we'll conquer  
By my sword you will die  
Ashes and ruins is all that remains  
As we laugh at your pitiful cries  
We're icemen from the North  
Death and destruction we bring forth  
Your resistance comes to no avail  
To untamed lands we sail  
Berserkers running free  
Unleashing death pain and misery  
Corpses litter the ground as they assail  
To untamed lands we sail  
The hammer of the gods is coming down  
Striking swift and silent without a sound  
Your demise shall quickly entail  
To untamed lands we sail  
Row on men of the North  
To a strange land we set forth  
Red man we do not fail  
To untamed lands we sail  
(Repeat Chorus)  
(Repeat 1st Verse)  
(Repeat Chorus)
