We're under manipulation by an alien being On
Civilization they have planted their see it's mass
Frustration for you feel you're the only one to see Your
Salvation is to break free They control the churches,
and
State In their power they can seal your fate But I'm too
Strong, I've seen through their lies I can't be bound,
I'm determined to rise.

I've got your number you pathetic queers Pray to your
Gods for your end is near You are nothing but liars and
Media scum We've got your number and Your number's
up!

Discrimination is their constant cry And integration is
Their biggest lie. Their corruption is eating us alive

It's a call for revolution or soon we will all die! They
Control the churches, and state In their power they can
Seal your fate But I'm too strong, I've seen through
Their lies I can't be bound, I'm determined to rise.

I've got your number you pathetic queers Pray to your
Gods for your end is near You are nothing but liars and
Media scum We've got your number and Your number's
up!

We've got your number you pathetic queers Pray to
your
Gods for your end is near You are nothing but liars and
Media scum We've got your number and Your number's
up!
