Do you have a clue?  
You don't have a clue  
I've seen you talking with your friends  
Friends  
Clever young jokes in a world that never ends  
Ends  
All the stars in the sky  
Just crossed your eyes  
All the blood to your brain  
Is in vain  
Is in vain  
Walking up the steps with the lies behind your lips  
All your stupid friends love you for your mind  
I've seen you, perfectly designed  
Don't make me smile, don't make me smile  
All you thoughts are perfectly unkind  
Don't make me smile  
All the stars in the sky  
Just crossed your eyes  
All the blood to your brain  
Is in vain  
Is in vain

Don't make me smile, don't make me smile  
All the stars in the sky  
Just crossed your eyes  
All the blood to your brain  
Is in vain  
Is in vain
