[Incomprehensible]

Congratulations you have won the right to anything you
want

An astronaut, a TV host, an open hand, a smiling face
Another medal for your race, an open door
Another opportunity to find out what it means to be so
lucky

Sit back, forget about the rest
Just remember you're the best
That this world has to offer

Oh, baby, baby it's a white, white world
Oh, baby, baby it's a white, white world
Well, baby, baby it's a white, white world
Come on baby, baby it's a white, white world

I don't want anything to do with this word
Right, it makes me sick
To think of people feeling better
Treating everyone like shit

Sit back, forget about the rest
Just remember you're the best
That this world has to offer

Oh, baby, baby it's a white, white world
Oh, baby, baby it's a white, white world
Well, baby, baby it's a white, white world
Come on baby, baby it's a white, white world

Come on baby, baby it's a white, white world
Come on baby, baby it's a white, white world
