I'm tripping into a whole new era
Love-struck bodies twisted in bliss
I never knew this raging heart existed
I never knew it could be like this
So won't you kiss me where I like it sonny
And I will insist that you do it again
Generations of women have fallen for this honey
Rolling so softly down from your lips
I've dedicated this ever-flowing moment
Deeper and deeper to come from my centre
Right into the very heart of your body
Soul and your mind for you to remember:
Be clever with your emotions sonny
And I will insist that you do it again
Generations of women have fallen for this honey
Rolling so softly down from your lips
I've manifested within this sunshine era
The life of a woman living in love
In existence a fully-grown black mammal
I take every inch as the moment comes
Kiss me where I like it sonny
And I will insist you do it again
Generations of women have fallen for this honey
Rolling so softly down from your lips
I'm tripping into a whole new era
Love-struck bodies twisted in bliss
I never knew this raging heart existed
I never knew it could be like this
So won't you kiss me where I like it sonny
And I will insist that you do it again
Generations of women have fallen for this honey
Rolling so softly down from your lips
