I got something
You never never never had before
I got something
I never never never gave away before
No other woman can give it to you
No other woman can do what I do
No other woman no no
I got something
I know you've been around man
You've had you shares of ups and downs
Been through to many lovers
Had a taste but never a bite
But look here
What I got for you
It's love and it's true true true
I got something
I got something...
Some say you've seen it all
That you were the first man on then moon
That you've got tired of flying
And ended up not really doing a thing
You talk a lot about your friends
How influential some of them are
Forget your hot connections
You don't have to sell it to me
But look here
What I got for you
It's love and it's true true true
I got something
I got something
