This is where it all begins  
I know I know  
It's not where the story ends  
It's where it all begins

You feel a little down  
You feel a little low  
Sometimes you lose your own way  
So take a little time  
Have a little faith  
Cos when the night is over  
It's then the day begins  
That's where it all begins

I know there's another way  
It's not where the story ends  
Tomorrow is another day  
I know I know  
There's another way  
It's not where the story ends  
It's where it all begins

I know it's been so long  
But keeping it inside  
Stand up and stole your own pride  
Tomorrow never knows  
Tomorrow never dies  
You'll see it with your own eyes  
That's how it all begins  
It's where it all begins

I know I know  
It's not where the story ends  
It's where it all begins  
Tomorrow is another day

I know I know  
There's another way  
It's not where the story ends  
It's where it all begins

Yo this is where the story started  
First chapter feeling wrapped up and departed  
You lacked faith the beginning was great  
Now your still in the phase where you'd be willing to  
break  
But now you can realise this is real life  
Try get onto a real vibe shot without your real pride  
So stop the moaning your bringing cos you alone will  
be sinking  
Now your at home and your thinking my persona is  
shrinking  
Now your thinking this is where the road begins

It's not where the story ends  
It's where it all begins

It's not where the story ends  
It's where it all begins

I know I know  
It's not where the story ends  
It's where it all begins  
Tomorrow is another day

I know I know  
There's another way  
It's not where the story ends  
It's where it all begins
