I'll take some more shots
Might as well
It's Friday night and you are hot as hell
The writing's on the wall dear
Can't you tell that you're the reason I'm here
Cause my hopes were high
But you showed up with another guy
So, I'll drink some more
The fact that you were with me, the night before
Just isn't settling

You tried so hard, I'm not impressed
You look so good in that leopard dress
Did you wear that for me?
Or was godliness the thing that got you
Here with the other guy
He doesn't care about the girl behind the pretty face
He wants to take you home dear
And have his way
He'll do anything just to take you home
He'll tell you that he loves you
If you'll take off all your clothes

Oh, just grab a girl and make her learn
That she will get everything that she deserves
You're out of reach
Now she's reaching out for you

You've had enough, just fight the urge
You're giving up everything that you deserve
For her
She's out of your reach but you keep reaching out

You tried to talk to me
Are you out of your mind, or are you confused?
Didn't I just see your lips on his?
Get out of my way
Cause I'm kinda pissed

I'm mad that you're not alone
Because you told me that you loved me

While I took off all my clothes
Then you showed up with him

Just grab a girl and make her learn
That she will get everything that she deserves
You're out of reach
Now she's reaching out for you

You've had enough, just fight the urge
You're giving up everything that you deserve
For her
Oh, she's out of your reach but you keep reaching out

We are drowning in the blood of our own hate
But don't hate girl, don't hate girl
We are frowning in the shame of our own fate
It's what we made, it's what we made
(x5)

Are you scared, are you lonely?
Did I hear you screaming "hold me"?
Are you scared, are you lonely?
Did I hear you screaming "hold me"?

Somebody take a hold of my hand
It's gonna be all right
Somebody help me understand
It's gonna be all right
