It doesn't seem like she is listening
To any word that comes out (that comes out)
And it might just be because she stepped up
While everyone else stepped out.

Now I'm running through these white halls
And I can see the blood trails on the floor
But hun, until this moment of my life
I've never felt this way before

So don't be alarmed, Mr. Doctor
I brought her some hope with her flowers.

[Chorus:]

And it's time, it's time for us to say goodbye
To all these tears you've cried
Without this, we might as well be kids forever
It'll seem to never, get too cold in late December.

Take one second think back to the places that you've
been
Or say any word that comes out (that comes out)
Whoa, c'mon baby you know I'm better than him
Oh Baby please don't let me down

Don't be alarmed, Mr. Doctor
I brought her some hope with her flowers

[Chorus]

Whoa
