its amazing what youll find when you just open your
eyes
sometimes love can leave you blind
but still you try to cover all the lies and ignore all the
signs
sometimes love can leave you blind

what i thought was a certainty has left me spinning in
circles again

comparing to the last time that we had spoke it seems
to
me that youre not happy like you used to be
to you im like a flavor that wouldnt last you took one
bite
than spat me out real fast
and now this mark remains and will never ever go away
