Hands up this is revolution
There's no second chance
We never gonna let you down
Breaking up here comes the solution
You don't need to stop
You don't need to let this out
Time to unleash the fury
It's about the passion
No need to feel so worry
It's just a need that you should trust

It's about the right time
You'll never know
It's about the disguise
Just let it go
It's about the passion
When all the days just seem so ordinary
It's about all those signs
Shining so bright
It's about the feelings
Covered inside
It's about the passion
When all the days just seem so ordinary

Hands up ain't no delusion
Try to find a passion
The passion you see in my eyes
Giving up, is no solution
Focus on your way, trust in people standing right
behind

This is the revolution
We lost our self control

I've been suffering, oh boy
Then I've opened up my eyes
And I have realised
My story isn't done so far
