Get up, do what you want  
Before, before it's too late  
Don't, don't worry yourself  
Of others I don't think

Kick down the door  
To hell for more  
Severe injections, a lethal dose  
Kick down the door  
To hell with poverty  
Clench your fist and shout at them all

Its just a lost cause

Clenched, clenched fisted shout  
We're souls, souls in ignorance

Break, break all the windows  
Shout deliverance  
Break all the doors  
Innocent victim  
Do what you want
