

## **Front Line Assembly "Corruption"**

Visit "[Corruption](#)" on [MotoLyrics.com](http://MotoLyrics.com)

The lowest form of life that's crawling in our streets  
From seedy dope pushers to the politicians we meet  
The sorry religious vomit that infests in our TVs  
The weapons that we sell to the trash in the middle east  
Murderous drug smugglers pay their way to pass  
They look the other way when they take the kickback  
We've got to put a stop to this senseless bullshit  
Take all these people and throw them in the pit  
Let us know - where our tax dollars are spent  
Tell us how - how much it costs to repent  
Time has come - for us to take a stand  
Let us know - when you meet our demands  
You can take this all to hell  
Shove it up your ass where the sun ain't shining  
We know now what it takes to defend  
If disaster strikes then they'll be hiding  
You can take this all to hell  
Shove it up your ass where the sun ain't shining  
We know now what it takes to defend  
If disaster strikes, then they'll be hiding  
Corruption  
From laundering money to hookers on the make  
There's always a scandal, someone's on the take  
They payoff for secrets, sell plans to a spy  
They cover their asses and say it's a lie  
Society cries when the vermin go free  
When they're done, what's left for me? This social  
disorder that's causing us pain  
Indecent disease, it's they who are to blame
