"We can't take prisoners - you know that."

Submissive ???? deviants

Rejecting all their casualties

Atrocities of mankind

Executed to extinction

If you analyze that ship of fools,

In the end you'll always lose

Your mental games are getting weak

They grow infected as you speak.

Burning skin that is not so real

Animate a conscious ideal

Dissolves into submission

Push the will of no recognition

Your face it cracks

You, you ??? on ????

The fossil shines

Shines right through

Take, take, take down the enemy.

If you analyze that ship of fools,

In the end you'll always lose

Your mental games are getting weak

They grow infected as you speak.

????? in the anarchy

You try to please the ????

Your shattered with self remorse

For better days or for worse.

"If he'd kept on beating on and holding him down it'd
be a different story"

Burning skin that is not so real

Animate a conscious ideal

Dissolves into submission

Push the will of no recognition

No recognition

Take down,

Take down the enemy.

Burning skin that is not so real

Animate a conscious ideal

Dissolves into submission

Push the will of no recognition
