Lung of love leaves me breathless
Tongue of fool lap me in enmity
Four walled secret lies among the Hessian
And flicker of the future could've saved the cindered
sister

And I'm motioning still they stand inside me
And moments until the one I leave
Colorless I kiss her cold forehead I feel life
Loose it in a minute and the ones to come feel too far
to care

And I'm motioning still they stand inside me
And moments until the one I leave
People concertina to my private magic lantern move for
me
With the senses all inclusive in the theater of triggered
memories

And I'm motioning still they stand inside me
And moments until the one I leave
And I'm motioning still they stand inside me
And moments until the one I leave

The one I leave, the one I leave, the one I leave
The one I leave
