born into race and nation accept family and obligation  
i'm not a citizen i'm not a citizen  
embrace tradition and occupation  
cull memory for assimilation secure for future  
generations  
secure for future generations  
i'm not a citizen i'm not a citizen laying in this cold field  
waiting for the call feeling right here in this uniform i  
think i got

them all academic or street education obtain degree in  
annihilation i'm not  
a citizen i'm not a citizen laying down in chambers  
waiting for the call  
seen your kind so many imes you got no chance at all  
laid out immobile  
hoping for that call it's in my mouth, under my skin  
sodium pentathol
