

## Fun Factory "Take Your Chance"

Visit "[Take Your Chance](#)" on MotoLyrics.com

Take your chance  
Bring your life up to the top  
And you never ever stop  
And you try to do it right

You better take your chance  
And luck will always be around  
Keep your feet down on the ground  
And you will never be alone

Come on come on take your chance  
Your life is very hard no time for romance  
You know that life is hard  
But you know that you'll make it  
There is only one chance in life  
And you better take it

You got some hard time  
You got some bad time  
You got some ruff time  
And you got some sad times

Listen to the word from the man Smooth T.  
We all get busy with the Fun Factory  
Once you're the winner  
But then you lose the game  
Don't try to hide your sadness  
'Cause we all feel the same

Praying to God  
And I hope He's going to save me  
'Cause when He's around  
I feel a special kind of safety

Take it, take it just don't fake it  
Put me in the spot and I won't fake it  
Take your chance  
Common take your chance

Take your chance  
Bring your life up to the top  
And you never ever stop

And you try to do it right

You better take your chance  
And luck will always be around  
Keep your feet down on the ground  
And you will never be alone

Ringidingiding, ringidingidingdong  
Me feel so sad y'all  
Me feel so sad y'all  
Can't control the beat of my heart y'all

Me felt so sad when I left my family  
Broken heart, sad eyes, low mentality  
You better watch me, you better watch me  
When I come to you, nobody can stop me

Listen to the words from the man Smooth T.  
We all get busy with the Fun Factory

Take a look over troubled waters  
Think about today what's up for tomorrow  
What you really want is a chance to be free  
How you're livin' what's about 'G'

Take a look in a looking glass  
In a life class, just watch me blass  
That microphone is right, straight to your heart

Take your chance  
Bring your life up to the top  
And you never ever stop  
And you try to do it right

You better take your chance  
And luck will always be around  
Keep your feet down on the ground  
And you will never be alone
