I am floating in the universe  
like on a silent ocean  
my mind is opened wide  
to understand our life

I see the secrets of mankind  
understand their destination  
everybody goes his way  
fullfills his duty in our world

Refrain:

I am drifting far away  
to an unknown peaceful place  
this is the place where I will pray  
so far away in outer space

I am still moving further out  
where men's eyes never will reach  
here you will feel  
freedom peace and joy

Now I am free of my body  
need no more air to breathe  
here is the point of no return  
no chance to go back
