Funker Vogt
"Take Care! [us Mix]"

Crowded cities polluted air
Every day is getting worse
Try to breathe the smoky steam
It will affect your lungs

Burning oil-fields in Iraq
A dark cloud darkens the sun
But this happens so far away
So why should I take care

We are living in a nightmare
We call it normal life
The time is reached that we take care
And stop dancing on the knife

The ozone-layer is destroyed
Deadly sunrays hit the earth
The world turns from green to grey
All that remains is dust

As long as I live it will be fine
There's nothing what I can do
The world will die and so do I
So why should I take care

We are living in a nightmare
We call it normal life
The time is reached that we take care
And stop dancing on the knife
