

Further Seems Forever "Stem The Loss"

Visit "[Stem The Loss](#)" on MotoLyrics.com

Stem the loss by degrees
Turn the screw, burn the sheets
Define the frame, work in rounds
Grain to grain, ground on ground
Stem the loss by degrees

We've got no force to weigh on
We'd better believe in something now
We've got no source to draw in
We'd better believe in something now
We've got tension on the wire
We'd better believe in something now

Man the lines, raise the stones
Burn the vines, set the bones
Tape the seams, water tight
Lay the beam, measure right

Start the search, duty bound
Sea to sea, sound on sound
Stem the loss, by degrees
Stem the loss, by degrees

We've got no force to weigh on
We'd better believe in something now
We've got no source to draw in
We'd better believe in something now
We've got tension on the wire
We'd better believe in something now
We've got, we've gotta believe in something
We'd better believe in something
We'd better believe in something now

Stem the loss by degrees
Turn the screws, burn the sheets
Stem the loss by degrees
Stem the loss by degrees
