

Fury In The Slaughterhouse "Survival Shake"

Visit "[Survival Shake](#)" on MotoLyrics.com

This is no story it's the key of existence
A little thing you better not forget
I don't know nothing bout it's a water-resistance
Why don't you use your head

And survive, survive, survive
You got to survive
Survive, survive, survive
You got to survive

So tell me darling what you wanna be
A welcome idiot in an appletree
I shake you up and I shake you down
Down to the ground

To survive, survive, survive
You got to survive
Survive, survive
All you got to do is to survive
You just got one life
All you got to do is to survive
You just got one life
So better be careful boy

Survive, survive, survive...
