Concepts of earth – the christian darkthrone  
But the tortured souls – shall transist  
The great fuck of belial  
That received the 37°C  
Continued controlled synapsis of mind  
Carefully observing the first steps  
(Transcendental horns penetrate – knowledge pleads  
wisdom seeds  
Eternal combihall, souls of the – size of a whilst wither  
whilst feathery...)  
Earth is as alien as any star in the sky  
So, can you breathe in satan's land?  
Immensly furzing all heavens...  
At last we bring you your autumn!
