

## **Futuro Incierto "Dumb"**

Visit "[Dumb](#)" on MotoLyrics.com

You know, these words sound right  
When they were in my head  
But when I start to speak, you know,  
They sound quiet dumb instead  
Wish I could make myself clear to you  
But my words never sound the way I want 'em to

You never get it right  
I know it is my fault  
Can't never explain myself  
I can't explain myself  
As I start to speak my brain disconnects  
Can't never explain myself  
I can't explain myself

Sometimes I wish I just should shut my mouth  
But then I find there really isn't shadow of a doubt  
And when I start to speak is bullshit once again  
No matter how I try to get to you it is vain

(X2)  
You never get it right  
I know it is my fault  
Can't never explain myself  
I can't explain myself  
As I start to speak my brain disconnects  
Can't never explain myself  
I can't explain myself
