

G. Love & Special Sauce

"What We Need"

Visit "[What We Need](#)" on MotoLyrics.com

[Chorus]

What we need
To pull it together now
Thats the funky sound [Repeat: x2]
What we need
To pull it together now
Thats the funky sound Repeat: x2]

Everybody need a flavor
That they can savor for the moment
Need a home that they can run to
Need a tool that they can try to
Now they try to lock us in the dark
Raise the light just when you spark with
Your music, your music

[Chorus]

Feel the earth move under your feet
Feel the pound of your heat that beat is so sweet
East side wild fire burn gonna find a fat tree
One of the beat box stars gonna ride it with me

[Chorus]

Cover me up with some wet rock but keep me fresh
Keep me out this hole and take me up with a shovel
Get me high as a motherfucker doin' his thing
Cause love keeps goin' love keeps me flowin'
This love is the only reason I can find my lift
When I'm walkin' down the street and my head is bent
Its just love that I need I cant resist the myth
Its for love that I lean its for love that I bang
East-side wanna catch a fat tree with one the beat box
Stars ridin' with me

[Chorus]
